

GET THE RIGHT SUPPORT

From flexible stretchers to patient immobilization equipment, Reeves' signature stretchers, spineboards, and body covers are built for the First Responder. Constructed of durable, vinyl-coated nylon, Reeves' patient movement equipment is lightweight, but strong enough to hold up to 1,000 pounds, providing the right support whatever the situation.

- The **Reeves® Sleeve** provides rapid patient immobilization while allowing personnel to maneuver through the narrowest of openings.
- **Reeves® Flexible Stretchers** are so compact that they allow the First Responder to carry many stretchers simultaneously when responding to an emergency.
- The **Reeves® Stadium Stretchchair** allows patients to be lifted from anywhere multiple steps, such as in a stadium or arena, create problems in removing patients.
- The **Reeves® Spine Board** provides optimal support to patients with spinal or neck injuries, minimizing patient movement during transport.

Reeves Sleeve | Reeves Spine Board | Stadium Stretchchair | 101 Flexible Stretcher | 103 Heavy Duty Flexible Stretcher | 104 Mass Casualty Flexible Stretcher | 105 Flexible Stretcher w/ Sealed Body Cover | 106 Heavy Duty Flexible Stretcher w/ Sealed Body Cover
